**March 2022**

Hi everyone,

I hope you are all staying safe during this severe pandemic in Hong Kong.

I am writing to update you on my academic progress over the past year. Last semester was my first semester having in-person classes at CUHK. I really enjoyed the experience and I made a few friends during the classes. I studied hard and as a result my grades were quite good.

In addition, I applied to go on exchange during the second semester of my third year. I applied to exchange at the University of Liverpool in the UK. The application was well received by CUHK, but I still need to wait for the University of Liverpool to accept my application. I'm really excited and I really hope I get to go even during the pandemic. I'm trying to save money but because of the current pandemic situation I am unable to continue part-time tutoring. I'm hoping to be able to continue again in the summer once the pandemic situation gets better.

The pandemic has also affected my studies at CUHK. We no longer have any in-person classes or labs and everything is conducted online. It is disheartening not being able to attend classes with my friends and online classes can be very boring.

Besides academics, I've also joined two committees. The first is the recycling committee of my college, Green Team. And the second one is the Bridge Club of CUHK. Because of the pandemic we are conducting our activities on online, but other activities that cannot be conducted online has sadly been cancelled. I'm glad to be a part of these committees because it gives me the chance to experience the social life of studying at university.

I'd like to end off by thanking everyone for their support. I really appreciate it!

Regards,  
Pak Kiu
