TO Pak Kiu
Prayer letter (4)
December 2022**

Hi everyone,

Thank you so much for all your continuous support over these past 3 years of my university studies. I am truly grateful for all everything that the church has done for me.

This semester has been particularly busy! I had a lot on my plate: from studies, to organising events for my committees, to projects and deadlines. My studies are quite challenging, but nevertheless I'm really enjoying studying engineering. Final exams are coming up in early December and I've quite nervous for them. In addition, I joined two committees last year: The Wu Yee Sun (WYS) Green Team and the CUHK Bridge Club. Both committees have kept me busy with organising events big and small. One noticeable event that I'd like to share is the CUHK Bridge Tournament that I organised in conjunction with HKU. The tournament was a huge success and I'm really proud to be given the opportunity to host it.

In other news, I worked as intern at China Light and Power (CLP) during this past summer. It was an enlightening opportunity which taught me so much about my future career prospects and working environment. I joined their generation team at the Castle Peak Power Station in Tuen Mun, and with the help of my colleagues and supervisors, I learned a lot about the generation process as well as an engineer's role in it. Luckily it was a paid internship so I saved up the pay cheques I received for something big this next semester.

And that is that I'm going on exchange to the University of Liverpool for semester two! I've received the unconditional offer to exchange there for the whole semester and I'm so excited. I've already booked the flights and applied for on-campus accommodation. I can't wait to fly next year in mid-January! But I hear that the winter in Liverpool is really cold so I'm quite dreading the cold, hopefully I get used to it. I'm really looking forward to this exciting opportunity!

I'd like to thank you all again for all the support you've given me and my family. It really has made a huge difference for us.

Regards,
Pak Kiu
